North Essex**
NHS Foundation Trust

Staff Survey

ESNEFT Staff Survey

The problem?

The Director of Finance wanted a better understanding of his departments staff survey results

- It had to be multilevel (Service, Sub Service and Department where available)
- It had to detail the positive and negative score and specific questions (200+ visuals)
- On a dataset that no one in finance was familiar with

The solution?

We're accountants – of course it was Excel!!!

ESNEFT Staff Survey

So what happened next.....

ESNEFT Staff Survey

The NEW problem?

Can we replicate what we had done for the Entire Trust?

- The dataset was over 1 million records for a Trust our size
- Had to be available to 500 departments across 40 sites
- Drillable to Division, Service, Sub Service and Department

The solution was not Excel

The solution was Power BI

Demo of Power BI
